

HSPATLAS.COM (75 cases)

Lungs:

1. CMV pneumonia
2. hydatid disease
3. acute bronchitis
4. pneumococcal lobar pneumonia
5. Aspergillus
6. neoplastic embolus
7. pulmonary thromboembolus
8. pulmonary edema
9. amyloidosis
10. hemorrhagic infarction
11. infant respiratory distress syndrome
12. squamous cell carcinoma
13. adenocarcinoma
14. small cell carcinoma

Lymphatics:

1. Hodgkin Lymphoma
2. tuberculosis
3. squamous cell carcinoma metastasis to lymph node
4. adenocarcinoma metastasis to lymph node
5. signet ring cell carcinoma metastasis to lymph node

Thyroid:

1. Graves' disease
2. Hashimoto thyroiditis
3. papillary carcinoma
4. follicular carcinoma
5. medullary carcinoma

Pancreas:

1. acute pancreatitis
2. chronic pancreatitis
3. fat necrosis
4. ductal adenocarcinoma

Salivary glands:

1. Warthin Tumor
2. pleomorphic adenoma

Adrenal gland:

1. pheochromocytoma

Heart:

1. myocarditis
2. pericarditis
3. myocardial infarction

Vessels:

1. atherosclerotic plaque
2. capillary hemangioma
3. lymphangioma

OUN:

1. glioblastoma
2. ependymoma
3. lung adenocarcinoma metastases
4. acute bacterial meningitis

Liver and bile ducts:

1. nutmeg liver
2. centrilobular necrosis
3. steatosis
4. cirrhosis
5. cavernous hemangioma
6. hepatocellular carcinoma
7. cholangiocarcinoma
8. metastatic adenocarcinoma

Stomach:

1. Helicobacter gastritis
2. adenocarcinoma, diffuse type - signet ring cell carcinoma

Large intestine:

1. pseudomembranous colitis
2. villous adenoma
3. tubular adenoma
4. hyperplastic polyp
5. adenocarcinoma

Appendix:

1. gangrenous appendicitis
2. phlegmonous appendicitis
3. oxyuriasis
4. carcinoid - well differentiated neuroendocrine tumor/neoplasm (NET)

Esophagus:

1. Barrett's esophagus without dysplasia

Prostate:

1. adenocarcinoma, Gleason score 3+3

Testis:

1. seminoma
2. yolk sac tumor

Ovary:

1. mucinous cystadenoma
2. serous cystadenocarcinoma

Cervix:

1. high-grade squamous intraepithelial lesion - CIN III, carcinoma in situ

Kidney:

1. renal amyloidosis
2. nodular glomerulosclerosis, Kimmelstiel-Wilson disease
3. clear cell renal cell carcinoma
4. papillary renal cell carcinoma

Skin:

1. squamous cell carcinoma
2. basal cell carcinoma
3. compound nevus
4. superficial spreading melanoma - SSM
5. multinucleated foreign body giant cell granulomatous reaction
